

# Power Steering

Power steering for vintage & classic cars

Enjoy driving your classic car, but do you (or your partner) find the steering to be too heavy? Would you like to cure this without changing the car's steering characteristics?

## EZ ELECTRIC POWER STEERING

### ELECTRIC POWER STEERING CONVERSION KIT

EZ Electric Power Steering uses EPS (Electronic Power Steering) systems as fitted in modern cars for all conversions.

It is speed sensitive, steering light at low speeds and doesn't become lighter at higher speeds. And when you require more assistance, with wider tyres or a smaller sports steering wheel, for example, the driver controls the amount

of assistance and the desired feel by turning a potentiometer, offering a distinct advantage over hydraulic systems with the little feel and no option to make adjustments.

The EZ power steering unit is neatly concealed so you can enjoy effortless power steering without spoiling the original look or authenticity of your classic. It is supplied with CNC

laser cut bespoke brackets that are designed to fit the original mounting points of your car meaning it can be easily installed with no cutting, welding, or modifications to your classic.

The steering rack and box also remain unchanged, retaining the standard steering ratio so, if you ever decide to remove the unit, the car can be fully restored to its original condition at any time.

- LIGHTING
- SWITCHES
- IGNITION
- WIRING
- HEATERS & ELECTRIC FANS
- ACCESSORIES
- BODY HARDWARE
- BRAKES & SUSPENSION
- CLUTCH KITS
- EXHAUSTS
