

Tools

AF and Whitworth spanners. Hand made leather tool bags, hand made classic car tool rolls.

Over the years, we have gathered various quality tools to aid you in your maintenance or restoration. It is always a good idea to carry a selection of fundamental tools in your car; for this, we have our bespoke range of beautiful handmade leather tool bags, top-quality leather made in England. We also offer tool rolls if you prefer this option.

TOOL ROLLS

HOLDEN CANVAS TOOL ROLL

Canvas tool roll with the Holden Logo. Holds up to 7 tools (Not included). Hand made in the UK
Length: 700mm Width: 300mm

Brown
090.1004

Green
090.1007

HOLDEN CANVAS TOOL ROLL

Canvas tool roll with the Holden logo. Holds up to 14 tools (Not included). Hand made in the UK
Length: 700mm Width: 400mm

Green
090.1005

Brown
090.1006

CASTROL TOOL ROLL

Canvas tool roll with 15 compartments and Castrol embroidered logo on the front

090.958

TOOL ROLL

Durable 12 compartment Tool Roll or Tool Wrap. 10 main storage pockets and 2 small tool loops. Blue water resistant polythene with securing ties. Size when open: 530mm x 290mm
090.040

LEATHER TOOL ROLL

Brown leather 8 compartment tool roll or tool wrap. When open it is 340 mm long

CAR LIFT OPTIONAL EXTRAS

EZ CAR LIFT RAMP EXTENSION KIT

The Ramp Extension Kit (REK) will extend the lift's ramps by 3 or 6 inches [8 or 15 cm]. This allows the lift to be used on vehicles with longer than 60 [152 cm] lifting points. If more length is needed a second set will add additional 6 inches increasing the lift's range to a total of 72 inches [183 cm] overall length. The length is adjustable in 3 inches [7 cm] increments

091.1002

ICE HOCKEY PUCKS FOR EZ CAR LIFT

The set consists of four (4) double stacks of Ice Hockey Pucks mounted to four (4) 10 GA (3.5mm) thick powder-coated steel bases. The double-stack creates a larger space between the vehicle and the lift. Typically used to avoid contact with objects in the vehicle's undercarriage (mufflers, gas tanks, etc.) which can be damaged or even crushed by the lift or its cross member

091.973

EZ CARLIFT GROUND CLEARANCE KIT

The Ground Clearance Kit is primarily used on vehicles with low ground clearance where the lift will barely roll under. The best application is on vehicles with low exhaust headers. The kit consists of two (2) low profile 20 inches [51 cm] long On Ramps and two (2) Wheel Blocks with Wheel Stops. All parts are made of brushed aluminum. The Ramps and the Wheel Blocks are 6 inches [15 cm] wide. The overall height is just 4 inches [10 cm], sufficient to clear any flange from a low header or provide sufficient height to freely roll the lift under the vehicle. Low headers are very typical on race cars, Cobras, Corvettes, GT 500s, and many of the hot rods. Typical low ground clearance vehicles like Porsches, Corvette Z series, Lotus, Nissan 350Z and all race cars. With 4.0 inches [10 cm] of height the kit could also be used as an Oil Change ramps. It should accommodate most cars

091.1003

LIFT BLOCKS

These are for use on the top of the lift's rubber pads mainly to protect sill panels etc. They will also provide additional space (gap) between the lift and the vehicle. The extra space between the car and the lift could also be utilized for storing and organizing your tools on the lift's ramp, making your job safer and more pleasant since you won't have to look for tools scattered all over the area. The set consists of four (4) lift blocks mounted to 3.5mm thick powder coated steel base. The base is designed to fit perfectly over the lift's rubber pad. Protects the sill from damage and additional support at lifting points

091.990

MOVING CASTER KIT

Comprises a set of four swivel casters, two of which have parking brakes on them. The phenolic casters are 15cm (6 in) diameter by 5cm (2 in) wide with roller bearings. They clip onto the legs of the lift and enable you to push the car around your garage. The casters can be left free to rotate 360 degrees or locked in the straight ahead or sideways positions. Useful for moving your car around such as from a storage area to a work area or to win space for an extra car in your garage. Then unclip them and use your lift without them

091.970

LIMITED SPACE KIT

This was developed specifically for single car garages, but also found application in the typical narrow or overcrowded garage. Allows the vehicle to drive over the low profile cross spacer (33mm high) instead of driving over the lift's 89mm high side platforms

091.971

WALL HANGER

A simple and convenient way of storing your car lift vertically against the wall on custom made aluminium brackets when the lift is not in use. Make sure that you make a good job of fixing the two brackets to the wall!

091.975

ELECTRIC SDS DRILL 230 VOLT 1050 WATT

Quality Electric Drill offered for use with our car lift 091.960, but also for all drilling jobs. Reversing facility for operating the lift. 4 functions - Drill, Hammer, Chisel and Chisel lock, Safety clutch, Depth rod, Supplied with adjustable side handle, pointed chisel, flat chisel, 3 x drill bits and 2.2m cable with BS Plug

091.968

To operate the E-Z CAR LIFT simply roll it under the vehicle, then set the lift's pads under the lifting points of your car, insert an electric drill into the lift's drive and watch as all four wheels clear the floor in less than a minute - no heavy or multiple lifting required! When not in use the lift can be 'stood up' or hung on the wall. For a suitable electric drill see the above.

EZ CAR LIFT

If you are looking for any practical advice, we have a large number of instructional videos on YouTube. In these videos, we demonstrate many of the products we stock, from the differences between them and advantages of using, to practical installation advice. (The video above shows ahow to use a EZ Car Lift.)

You can find all our videos on YouTube, search for our Holden Vintage & Classic channel.

- Made in the U.S.A. this lift is delivered to your door by carrier
- The individual parts are not too heavy, below 25kg (56 lbs)
- Assemble it and roll it under your car and it lifts 660mm (26in)
- When up the 4 legs allow you almost unobstructed access to the underside of your car
- Designed for maximum car weight of 2,000kg (4,400 lbs)

091.960

Part No. 091.960 includes the two side platforms, 1520mm long, that support the car

Cross Spacer
091.964 to 091.967

Cross Spacer with
casters fitted

Part No. 091.960 provides everything you need except the Cross Spacers. Measure the width between the jacking points or other selected points on your chassis/body and select the appropriate cross spacer set from the list below. (If you have more than one car you may need more than one set)

Cross Spacer Set - Working Range 500mm to 810mm 091.962

Cross Spacer Set - Working Range 1270mm to 1580mm 091.966

Cross Spacer Set - Working Range 560mm to 890mm 091.974

Cross Spacer Set - Working Range 1530mm to 1830mm 091.967

Cross Spacer Set - Working Range 660mm to 970mm 091.964

Cross Spacer Set - Working Range 1150mm to 1450mm 091.9101

Cross Spacer Set - Working Range 970mm to 1270mm 091.965

Cross Spacer Set - Working Range 790mm to 1100mm 091.9120

JERRY CANS

JERRY CAN 5 LITRES
125mm x 220mm x 275mm. UN
Approved specification
091.675

JERRY CAN 10 LITRES
130mm x 390mm x 280mm. UN
Approved specification
091.676

JERRY CAN 20 LITRES
155mm x 465mm x 345mm. UN
Approved Specification
091.677

SPOUTS
Clip on flexible spout for jerry cans
091.675, 091.676 and 091.677
091.678
Clip on Rigid Spout for Jerry cans
091.675, 091.676 and 091.677
091.679

POURING CANS

CASTROL POURING CANS

(Left) There was a time when those green CASTROL pouring cans were to be seen on almost every garage forecourt. We offer three original sizes, original green colour and original livery. Not only useful in the garage, but very decorative in the study or even for flower arranging!

Half Pint	090.375
One Pint	090.376
One Quart	090.377
Set of three	090.378

FUNNELS

METAL FUNNEL WITH FILTER
Heavy duty steel with brass filter
091.598 152mm diameter at the top
091.599 203mm diameter at the top

HAND TOOLS

LUCAS SWITCH BEZEL TOOLS
Where LUCAS switches are secured by bezels it is sometimes difficult to undo the bezel to release the switch, and then do them up tightly again. These two tools are designed to make the job easier, the smaller one for LUCAS toggle switches and the larger one for ignition switches
095.193

SET OF THREE NUT SPLITTERS
For the safe removal of corroded, damaged or seized nuts without damaging the thread of the stud or bolt. Drop forged steel bodies, hardened and tempered with plated finish. Threaded splitting pins manufactured from chrome molybdenum steel hardened and tempered. Capacities 9 to 12mm, 12 to 16mm and 16mm to 22mm
091.571

STUD REMOVER & INSTALLER
Use with 1/2" square drive to remove or install studs from 6 to 19mm diameter (1/4" to 3/4")
095.019

UPHOLSTERY CLIP REMOVER
For removing upholstery clips and complete door panels easily
095.053

WHITWORTH/BSF COMBINATION
Budget quality 6-piece spanner set, ring one end
• 3/16" to 1/2" Whitworth (1/4" to 9/16" BSF)
• Chrome vanadium steel
• In a useful tool roll
Spanner sizes refer to the thread size and NOT the head size
094.579

WHITWORTH/BSF OPEN-ENDED
Budget quality 6-piece spanner set, both ends open ended
• 1/8" to 1/2" Whitworth (3/16" to 9/16" BSF)
• Chrome vanadium steel
• In a useful tool roll
Spanner sizes refer to the thread size and NOT the head size
095.172

METRIC COMBINATION
Expert quality 11-piece spanner set by Draper in tool roll
• 7mm - 19mm across flats
• Forged from chrome vanadium steel, hardened, tempered, chrome plated and polished throughout
094.554

SPARK PLUG SOCKET
Socket with plastic coated swivel T handle. Socket is forged steel, hardened, tempered and chrome plated with rubber insert for spark plug insulator protection and retention.

For 18mm spark plugs
090.360

TORQUE & RATCHET WRENCHES

TORQUE WRENCH CLICKING TYPE - 1/2" SQUARE DRIVE
With reversible ratchet head. 1/2" Square Drive. The lb-ft and Nm scales are engraved on the barrel of the wrench. The micrometer type sleeve allows accurate preset torque values to be set. When torque is reached an audible click is heard and the tension is released. The marked ranges are 22.1 to 154.9 lb-ft and 30 to 210 Nm. Overall length 475mm. Testing and recalibration of torque wrenches should be carried out on a regular basis to ensure accuracy
094.795

TORQUE WRENCH PRECISION TYPE - 1/2" SQUARE DRIVE
With reversible ratchet head and locking preset action. 1/2" Square Drive. Torque values are viewed through a window in the handle. Range 50 to 180 Nm to plus or minus 3%. Overall length 520 mm. Full instruction manual and calibration certificate included. Testing and recalibration of torque wrenches should be carried out on a regular basis to ensure accuracy
094.796

1/2" SQUARE DRIVE RATCHET
Body forged from chrome vanadium steel, hardened, tempered, chrome plated and polished. Sprung ball to retain sockets securely & quick release mechanism for easy release of sockets and accessories: 1/2" Square Drive. 250mm long with 45 tooth ratchet and forward/reverse selector (shown)
094.793

PLIERS

GENERAL PURPOSE
Industrial quality, made from chrome vanadium steel, hardened, tempered and mirror polished with induction hardened edges for extra durability. Special heavy duty non slip moulded handles for added grip, with slip guards for extra safety. Overall length 180 mm
092.275

LONG NOSED PLIERS
Industrial quality, made from chrome vanadium steel, hardened, tempered and mirror polished with induction hardened edges for extra durability. Special heavy duty non slip moulded handles for added grip, with slip guards for extra safety. With half round jaws, useful for getting into confined places. Overall length 160 mm
092.278

SOFT JAW ADJUSTABLE PLIERS
Made from chrome vanadium steel, hardened, tempered and with the jaws chrome plated and polished. Cushion grip handles. Adjusts over 8 positions to a maximum capacity of 40 mm. For use on plated fittings that can be easily damaged using conventional steel jaws. Supplied with spare set of soft jaws, which are also available separately refer to **095.106**
095.105

CIRCLIP (SNAP RING) PLIERS SET
The proper tool for removing circlips (snap rings). Internal and External Circlip Pliers supplied with a selection of four interchangeable heads

TOOLS

MECHANIC'S STOOL

Height adjustable stool with PVC top (380-490mm) which is padded and sprung for comfort. Supported on five castors to enable you to move around. Base is tool storage tray. Useful for many jobs around your car or motorcycle in the workshop

095.216

MEASURING & STAMPING

LETTER STAMP SETS

Sets of letter stamps, all 26 capital letters of the alphabet, manufactured from alloy tool steel, hardened and tempered. Packed in a plastic box. Ideal for marking car parts:

094.808 6.35mm tall (1/4")

NUMBER STAMP SETS

Sets of number stamps, 0 to 9, made from alloy tool steel, hardened and tempered. Packed in a plastic box. Ideal for marking car parts:

094.811 6.35mm tall (1/4")

SCRIBER

Double ended hardened scriber with straight and 90 degree points. Ideal for marking out

095.628

AUTOMATIC CENTRE PUNCH

Expert quality heavy duty Automatic Centre Punch with spring-loaded steel point with adjustable striking force. You press it down and it 'fires' the centre mark into the metal. Ideal for marking where you want to drill holes

094.563

ENGINE TESTING & TUNING

COLORTUNE MIXTURE TESTER

(Left) Colortune fits in place of any 14mm plug, and enables you to see the colour of the burning air/fuel mixture. Adjust until you have the correct blue colour

091.981

ENGINE MAINTENANCE

CLIKADJUST TAPPET ADJUSTER

Use with a 1/2" square drive socket to fit your car's tappet adjusters. Slacken the locknut, close the tappet completely using the built in screwdriver until Clikadjust clicks loudly, then reverse the screw driver until by counting the clicks the correct clearance is achieved. A table of clearances which tells you how many clicks correspond to the manufacturers clearance is supplied. This device takes up wear and the resultant setting is very accurate

091.985

SELF GRIP OIL FILTER WRENCH

Drop forged chrome vanadium steel jaws, hardened and tempered. Adjustable between 53mm and 118mm diameter. Quick release lever

095.821

VALVE GRINDING KIT

Double ended valve grinder & fine & coarse carborundum paste

094.831

VALVE SPRING COMPRESSOR

Made from selected steel and zinc plated, with plastic coated locking handle to keep valve springs positively compressed during work. Capacity 55mm to 175mm, throat 150mm

094.830

PISTON RING COMPRESSOR

Spring steel band wraps around the rings and piston to enable you to enter the piston into the cylinder. Adjustable from 60mm to 100mm bore diameter with adjusting key provided

094.826

TOOL KIT FOR SU CARBURETTORS

Comprises two jet adjusting spanners and needle/seat tube nut spanner

090.696

CARBURETTOR SYNCHRONISER

Fits over the carburettor intake with an adjustable baffle to allow you to adjust the flow through the instrument to get the float half way up the tube which can be swiveled to the vertical whatever the angle of the carburettor intake. Measure each intake in turn and adjust the carburettors accordingly. This synchroniser is of metal construction

090.043

LOCK WIRE PLIERS

For fast and efficient lockwiring of nuts in safety critical applications. As used in the aero, defence and racing industries. 250mm overall length, made from chrome vanadium steel

090.008

090.010 Stainless Steel Locking Wire 0.028"

BEARING RACE & SEAL DRIVE

For inserting bearing races and oil seals straight and easily, up to 64mm (2.52") diameter

091.315

ELECTRICAL & BATTERY

POCKETMETER MULTIMETER

By Gunson. A range of 19 scales makes this ideal for all electrical or electronic testing. DC volts to 1000 volts, AC to 750 volts. DC current to 10 amps. Resistance to 2000k ohms. Diode and transistor test. Size 70 mm x 125 mm x 27 mm

091.119

BATTERY CHARGER 6 & 12V

For recharging both 6 and 12 volt conventional lead acid batteries up to 45 Ah from 230 volt mains. The effective charging rate is 4.2 amps. Features include insulated copper leads and battery clips, charging status display and folding carrying handle. Size 240mm x 210mm x 145mm

094.542

Designed to keep good batteries from 1.2Ah to 100Ah in good condition on positive and negative earth vehicles. They use PRIMARY SWITCHED electronics and then constantly monitor any voltage loss due to clocks etc. or natural drainage and bring your battery back to being fully charged. Each one is supplied with a connection kit for difficult to reach batteries

CIGAR LIGHTER SOCKET ADAPTOR

Enabling you to plug Conditioners and Charger/Conditioner **094.362, 094.366, 094.363 & 094.368** into a cigar lighter socket and charge your battery through the cigar lighter
094.365

PANEL SOCKET

Mount this socket on a suitable panel (hole size 20 x 30mm) and connect the wires to your 12v battery then plug in your charger plug. Socket includes an LED indicator to show the state of charge of your battery. 1.5 metre cable. 10 amp max
094.367

ADDITIONAL CONNECTION KIT

Enabling you to use Conditioners and Charger/Conditioner **094.362, 094.366, 094.363** and **094.368** on a 2nd car or motorcycle
094.364

DEFLATION VALVE 6-18 P.S.I.

For vehicles that are used both on and off the road. This device enables you to quickly reduce the pressure for off road use giving improved traction. The valve is a multi-setting device allowing you to select a suitable pressure 6 - 8 - 10 - 12 - 14 - 16 p.s.i.. The valve is then screwed onto the tyre valve and the tyre pressure reduces to that required and shuts off. Normally you would have one deflation valve per tyre that you will need to reduce the pressure. 98mm long and 31mm diameter at its widest point
091.086

VALVE TOOL

Tyre Valve Stem Repair Tool. for removing and repairing tyre valves
095.046

FOR BATTERIES SEE PAGE 132

TYRE TOOLS

DIAL TYPE GAUGE

With 250mm flexible hose and angled connection. Air release valve. Reads 5 to 100 p.s.i. (0 to 6 bar)
090.987

Spare Protective Shroud for tyre pressure gauge **090.987**. Protects the gauge from damage
090.985

NO LOSS VALVE CAPS

With a polyethylene retaining strap which is pushed over the valve threads into the groove at the base of the threaded section preventing the cap from going missing. To make a good seal an integral nitrile rubber seal gives pressure security. Supplied in a set of four

091.089 Brass
091.088 Nylon

VALVE EXTENSION

Valve Extension 90 degrees. Extends your tyre valve to make access easier

094.949

TYRE TRAINER

A popular accessory, manufactured from tough plastic, which is designed to extend the life of your tyres, and prevent flat spots, without jacking your car up. Also less bulging of the sidewall reduces the potential for cracks. Suitable for cars being laid up, or not used, for extended periods, also trailers, caravans and motorhomes. Can also be used as a garage stop marker by bolting down to the garage floor. Sold as a pair

095.175

TUBE VALVE PULL THROUGH

Feed it through the valve hole in the rim and screw it onto the valve on the tube and use it to pull the valve into the valve hole. Also has a valve key in the handle

095.229

BRAKE TOOLS

TUBE BENDER

For 3/16" brake tubing
094.531

MITYVAC BRAKE BLEEDING KIT

The principle is to 'suck' the fluid through the system using a vacuum pump. The kit contains the vacuum/pressure pump and all accessories necessary to enable you to perform one-person bleeding, at the road wheel, without the need to depress the brake pedal. Supplied with full instructions

090.388

PROFESSIONAL FLARING TOOL KIT

For making the correct flare on 3/16" and 1/4" copper or kunifer pipe. Use in vice. Packed in a plastic box. As used by professionals

094.534

BRAKE HOSE CLAMP

When working on your brakes it is often desirable to clamp a flexible hose to prevent fluid running out of the brake system. Use this hose clamp for this job

094.535

PIPE DEBURRER

For deburring and cleaning up the ends of 3/16" brake tubing

094.532

EEZIBLEED BRAKE BLEEDER

Uses the air pressure in your (spare) tyre! With a pressure vessel to hold the new fluid, a pipe with cap to fit your reservoir, and an air pipe to connect to the tyre. Operate each bleed valve in turn until clean fluid appears. You do the job in minutes and use only 1/4 lb pressure from your tyre. Several screw caps are provided. If you can't find one to fit your car, send one back with a description and we will exchange it, free of charge. Full instructions provided

091.980

STEERING TOOLS

BALL JOINT SEPARATOR

Manufactured from drop-forged heat-treated alloy steel to stand up to hard usage. Position wedge end between parts to be removed and deliver a few sharp blows with a hammer. Makes the job of adjusting or replacing ball joints much easier! Jaw opening 19mm, length 400mm

PLAIN SCREWDRIVERS

For plain slot screws. Hardened and tempered chrome vanadium steel blade with soft grip polypropylene handle:

- 6mm wide tip, 38mm blade length **094.750**
- 6mm wide tip, 150mm blade length **094.752**
- 8mm wide tip, 150mm blade length **094.753**

CROSS HEAD SCREWDRIVERS

For cross head screws. Hardened and tempered chrome vanadium steel blade with soft grip polypropylene handle:

- No 2 tip and 100mm blade length **094.758**

ELEMENTARY DESIGN, SET NO.1

This unique and beautiful designer Screwdriver is hand-made in England. It has a solid beech handle and a solid brass ferrule. Its handle is ergonomically designed to fit comfortably in the hand so it can be used for long periods of time. It comes complete with six different interchangeable bits.

095.090

ELEMENTARY DESIGN, SET NO. 2

The specially shortened version of The Screwdriver is designed for working in a space which is tighter and more confined. The handle fits snugly into the palm of the hand and pressure can be exerted in even the most difficult circumstances.

095.091

ELEMENTARY DESIGN, SET NO.3

Combined Number 1 and Number 2 Screwdriver in attractive box. This set comes complete with nine interchangeable bits.

095.092

ROBERTSON SCREWDRIVERS

The Robertson woodscrew has a square-shaped socket in the screw head and a square protrusion on the screwdriver. Both have a taper, which makes inserting the screwdriver easier, and also tends to help keep the screw on the screwdriver tip without the user needing to hold it there. Robertson screwdrivers are easy to use one-handed, because the tapered socket tends to retain the screw, even if it is shaken. Robertson woodscrews can be removed if old or painted over. In industry, they speed up production and reduce product damage. For details of Robertson woodscrews refer to page 290

SCREWDRIVERS SIZE 2

For Robertson No. 4 & 5 woodscrews. Handle coloured red for identification

Junior 190mm long (left)

HAMMERS & MALLETS

HAMMER THOR No. 2

Copper and hide faces, either side of the head. A safer alternative for striking machined surfaces than conventional steel hammers. The impact resistant striking faces shape themselves to the component being struck, minimising rebound damage to the component and reducing noise. The Copper face combined with the Malleable Iron head gives a SAFE but high-impact blow, whilst the Hide face gives a firm resilient blow that will not mark the finished work.

Original equipment in many Jaguar, MG, Triumph TR tool kits of the 50s & 60s

Faces are designed to wear and can be replaced. See spares on the right.) Weighs 2.5lbs.

090.012

SPARES

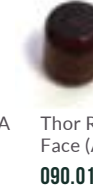

Thor replacement round copper striking face

094.526

Thor Spare Copper Striking Face A

090.009

Thor Replacement Hide Striking Face (A)

090.011

Thor Replacement Hide Striking Face

094.525

HAMMER
